Subject : Application for Summer Internship Software Development

Dear Sir ,

I am a first-year B.Tech student with a strong interest in software development, and I'm reaching out to explore internship opportunities at your organization.

I have been actively building my skills in Java and recently developed a URL safety checker that evaluates links using a risk scoring system along with user reporting features. Working on this project helped me understand how real-world applications handle user input and data.

I am eager to gain practical experience and contribute to meaningful projects, and would appreciate consideration for any relevant internship opportunities.

You can find my work here:

<https://github.com/aishwarya25bce>

Thank you for your time and consideration

Yours sincerely,
Aishwarya Prasad
